Re: Our File: 56717.0004 (KMB12383-04/ejg)  
Invention: Bird Scaring Device  
Application No.: 10/032,454  
Filed: January 2, 2002  
Country: United States  
Inventor: Ulrich Watermann  
Examiner: Jeffrey L. Gellner  
Art Unit: 3643  
Due Date: March 9, 2004

OFFICIAL

The Commissioner of Patents and Trademarks  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

Agent for Applicant acknowledges receipt of Advisory Action dated May 30, 2004 whereby Examiner stated that the proposed amendment does add the language of the third line being directly attached to the swivel which Examiner recommended; however, deletion in claims 1 and 11 (it is likely that Examiner meant claims 1 and 13) of the language of "for rotation of said third line relative said first and second lines without tangling said lines relative said holes" would require further consideration.

**AMENDMENTS TO CLAIMS**

Agent for Applicant respectfully requests that the claims from the previous amendment be entered plus the changes Examiner referred to above without adding any new subject matter, as follows:

1. [Four x Amended] A device for scaring birds comprising:
  - (a) a silhouette of a bird of prey having at least two holes therethrough;
